

FINANCE OS

Marketing Plan

Demand, content and the channels that convert.

01

Positioning

Finance OS is the calm, dependable operating system for serious brokers. The voice is authoritative and clear ? Ruler-led, Sage-softened.

Every surface is on-brand: dark-mode luxury, tokenized, never loud.

Channels

A blend of owned content (the broker brief newsletter, guides and swipe files), paid acquisition, and partner referrals feeds the top of the funnel.

Lead magnets ? flipbooks, checklists, calculators ? capture intent and route it straight into the system.

Content engine

Repurpose one walkthrough into many assets: social posts, blog articles, email sequences and short clips, all from the same brand kit.

Consistency comes from the design system; speed comes from the templates.

Measurement

Track capture rate, cost per qualified lead, and the conversion from magnet to booked call.

Placeholder benchmarks sit here until your campaign data lands.
